

AI Interactive Flat Panel

65, 75, 86, 98 and 110"

**VA-M
Series**

The Veltra VA-M Series Smart Board delivers a next-generation experience powered by an CA73 4-core processor built on 8nm architecture.

It supports stunning 4K resolution and AI-enhanced performance for smooth and immersive visuals. Designed to boost productivity in both educational and corporate collaboration environments.

Real-time screen sharing and an intuitive user interface make interactions seamless and efficient. Equipped with a wide range of ports—HDMI, Type-C, NFC, USB 3.0—offering versatile connectivity options.

Easily integrates with various devices to support flexible workflows and expansion. Purpose-built for smart classrooms and modern workspaces with cutting-edge interactive features.

Includes secure login via NFC and fingerprint recognition for fast, personalized access.

Runs on Android 14 OS with direct sign-in to Google and Microsoft accounts for streamlined productivity.

8MP Camera

AI Note is a next-generation interactive whiteboard software designed for educators, students, and professionals. It features AI voice control, auto courseware and quiz generation, real-time translation, handwriting-to-text conversion, formula recognition, 3D modeling, and integrated PhET simulations. With mobile connectivity, multilingual support, and an intuitive interface, AI Note transforms teaching and collaboration into a seamless, intelligent experience—perfect for modern AI-driven classrooms.

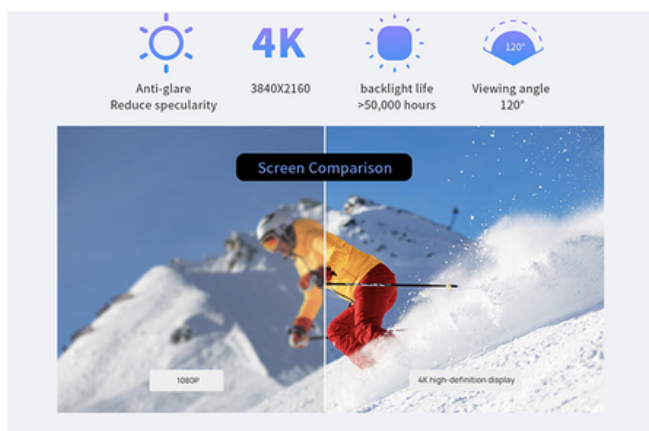

Power Meets Seamless Interaction

Experience ultra-smooth performance with the MT9679 processor, featuring a Quad-Core ARM Cortex-A73 CPU and Mali-G52 GPU. Optimized for 4K displays, it delivers fast response, AI-powered image enhancement, Wi-Fi6, Bluetooth5.2, and USB3.0 for seamless teaching, collaboration, and multimedia.

4K UHD Anti-Glare Display with Durable Glass Protection

Experience stunning visual clarity with a 4K Ultra HD screen that delivers vibrant colors and sharp details—ideal for both educational and business settings. The anti-glare technology ensures that content remains clear and visible even under strong ambient lighting or direct sunlight, reducing eye strain during long sessions. For added durability and user safety, the display is protected by Mohs 7-rated tempered glass, which resists scratches, impacts, and everyday wear. This makes it a reliable choice for high-traffic environments like classrooms and conference rooms.

PhET Interactive Simulations - Engaging Teaching Resources

Enhance STEM education with built-in access to PhET Interactive Simulations, developed by the University of Colorado Boulder. This platform includes:

- 168 simulations in science and math
- 124 language translations for global accessibility
- 3,600+ teacher-submitted lesson plans and activities

PhET makes complex concepts easier to understand through interactive, inquiry-based learning—ideal for classrooms looking to inspire curiosity and engagement.

Versatile Connectivity with Type-C

Enjoy effortless integration with a wide range of devices through the multifunctional Type-C port. The RK3588 smart board connects seamlessly to webcams, microphones, speakers, USB drives, and wired networks – all with a single cable. Plus, with up to 100W of charging power, your device stays fully powered throughout even the longest sessions.

Multiple Ports for Seamless Connectivity

Our interactive smart board features a comprehensive array of ports, including HDMI, Type-C, NFC, USB 3.0, and more. This versatile connectivity ensures effortless information transfer and simplifies device integration, enabling greater flexibility and efficiency in any setting.

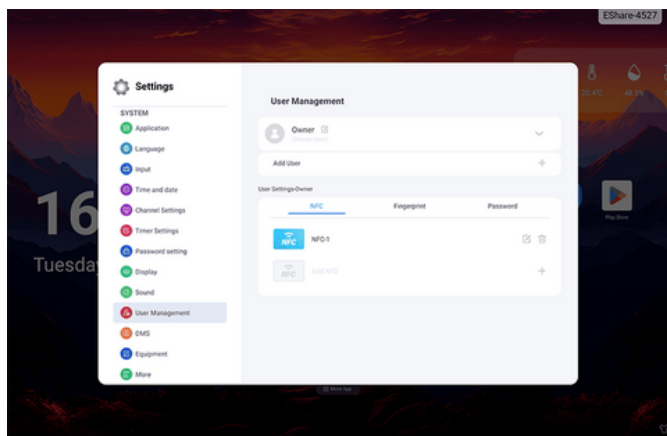

Beyond the Cloud, Into the Ecosystem: The Smart Board Experience

Veltra EDLA experience goes beyond traditional cloud services, offering seamless integration with Google's expansive ecosystem. This strategic alignment transforms the smart board into a powerful collaborative hub, leveraging Google's wide range of tools to enhance interactivity, productivity, and user engagement.

NFC & Fingerprint Login for VA-M Series Smart Boards

Enjoy secure and effortless access on VA-M Series powered interactive flat panels with integrated NFC and fingerprint login. This advanced feature allows users to log in directly to Daisy OS, enabling instant access to Google and Microsoft accounts—streamlining workflows and boosting productivity.
